

Kala AppliKator Flatbed Mounting Table

The Kala AppliKator is a flat-bed lamination and mounting table. Kala has taken their expertise in engineering and technology found in their award-winning laminators and have created the industry's finest flatbed mounting table. This table is the ideal solution for mounting, 1-off laminating and applying pre-mask.

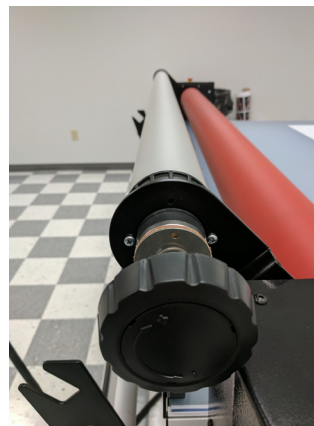

Standard Features

- Roller elevation is achieved with two electric motors. No air compressor is necessary.
- Roller pressure is electronically adjustable from the control panel with three pre-set pressure positions.
- Built-in safety laser system that detects objects between the table surface and the roller.
- Material unwind linked to the roller with additional storage of rolls at both ends of the table.
- Advanced LED lighting system for a large and improved visibility range with a low energy consumption.
- High-quality non-stick silicon roller surface for a prolonged lifecycle.
- Table edge rails include a cutting guide to quickly cut media with a regular knife.
- Ample storage room directly beneath the work surface (a feature that cannot be found on any competitive mounting table).
- An anti-static, phthalate-free, PVC cutting mat covers the entire surface of the table.

Optional Accessories

Roll unwind support with brake tension

Compatible with a 3" diameter 1650mm (65") shaft from Kala. Heavier reels of media can be loaded on this shaft with brake tension.

Storing Support for 3 reels

Can be located on the end of the table to support up to 3 shafts or bars, to store or unwind media on the table. Can be fitted on both ends, so 6 storage & unwind solutions possible.
