

DuraGuard UV Matte

DuraGuard UV Matte

DuraGuard UV Matte is a heat-set laminating film that adds a satin-matte finish without sacrificing color definition.

Uses

The soft, non-reflective finish of DuraGuard UV Matte makes it the film of choice for direct lit graphics. It can be used for tradeshow displays and POPs, as well as to laminate ink-jet output printed on canvas. It's also an excellent choice when mounting multiple images onto a single board.

The Quality Media Difference

We find the best solutions for your mounting and laminating needs and bring them to you... on time and on budget. So you never have to worry about waste, reprinting, or relaminating.

Size	Catalog #
38" x 328'	0440438
41" x 328'	0440435
43" x 328'	0440440
51" x 328'	0440450

Information provided here is based on research and is believed to be reliable as of printing date. This information does not constitute a warranty. All material should be tested by purchaser to determine final suitability. Quality Media will not be held responsible for customers end use of product. Quality Media is available for directions and advice as to proper use and application of our products.

Specifications

Finish	Satin-matte
Base Film/ Filmic Carrier	2.0 mil (25 micron) PVC (vinyl)
Adhesive Bond	1.0 mil (25 micron) solvent acrylic
Release Liner	Moisture stable paper
Initial Tack	Low
Application Temperature	170° to 210°F (77° to 99°C)
Application Speed	1' to 6' (0.3m to 1.75m) per minute
Notes	To keep film from stretching as it becomes soft and pliable when heated, apply only minimal brake tension to unwind supply shaft and release liner take-up. Adjust take-up shaft in such a way that release liner is removed just prior to entering rip rollers. By reducing adhesive's exposure to air, there is less chance of picking up dust particles.

Ordering
