

DuraPrint Satin Lightblock

Product Description

DuraPrint Satin Lightblock is a polyester film with a satin textured surface providing for optimum ink adhesion and scratch resistance. The base film is a satin textured white top layer fused in manufacturing to a gray back block-out layer that will not split, curl, buckle or warp, providing for a dimensionally stable final product. The blockout layer hides the display hardware and eliminates light transmission that can weaken image density.

Uses

- Pop-Up and Roll-Up Displays
- POP Displays
- Signage and Advertising

Advantages

- Durable/Scratch Resistant
- Compatible with solvent, UV and latex printers.

7 Mil Part #	Size
