# Compadre™

*your new  
friend from AGL...*

## Competitively Priced American made Laminator, with a Video Training Package!

 *With your Compadre you can breeze  
through these processes and more...*

- **Laminate Vinyl Decals** - single sided with absolute flat output, protect your decals from fading, get great color fastness, durability, image enhancement, and increased longevity.
- **Pre-mask Vinyl Decals** - eliminate image distortion when mounting, without working to death with tiny handheld squeegees. You can pre-mask vinyl letters too.
- **Mount Vinyl Decals** (cast or calendared) - to any substrate effortlessly with no wrinkles, no bubbles and perfect alignment, eliminating do-over's. And do it all with a single operator.
- **Over-laminate and premask in one pass** - that's right, using AGL's cover-Rite V2 you can cut a seven step process down to 3 steps.
- **Laminate Banners of course!** - or turn ordinary paper prints into decals to mount to any substrate, create floor graphics and more.
- **Tailor your inkjet output for the customer's application.** Stop selling me to products. Using different over-lams and processes you can separate your products from your competition.

### Made for solvent inkjet printers!

#### Exclusive Compadre Video Training Package Supplied with Laminator

Compadre introduction video for explanation of all the innovative new features. This video is the first video you should watch before operating your Compadre laminator. It is comprehensive over view of how the laminator works, and complements the owners manual.

This 2 part video first covers turning a paper inkjet or photographic print into a decal for mounting. In the second part the decal is mounted to a board (substrate). Materials used are Cover-Rite V6 M, Mount-Smart Gold, and black foam board.

This video covers mounting a typical solvent inkjet vinyl decal to a substrate. Materials used, vinyl inkjet print and 1/4" white Sintra

*\*note it is recommended to premask large decals before mounting when critical registration must be obtained. i.e. tiled panels*

This video covers premasking large vinyl solvent inkjet vinyl decals. You can use the same process for premasking cut vinyl letters.

*\*be sure to see AGL's new over laminate Cover-Rite V2 video - Now you can over laminate and premask in one pass!*

This video covers laminating just the top of an image. Referred to as "single sided laminating." Materials used are Cover-Rite V6 L and Easy Sled KP.
