InstaShield Poly Matte

InstaShield Poly Matte is a 3 mil, high quality, non-PVC matte overlaminate with an hi-bond adhesive.

Uses

- Ideal for protecting graphics for use on flat surfaces.
- Non-PVC Applications

Advantages

- Provides a non-glare, scratch resistant surface.
- Will not silver or cause a clouded effect.

Performance Guidelines

- Laminate with heat at least at 122ºF and run laminator at a slower setting at full pressure.
- Printed materials must be properly dried before applying the lamination.
- Ideally, the lamination should be allowed to cure for 24 hours before trimming.
- When rolling up the graphics, roll with the laminate side on the outside on a 3" core.
- Before installing the film, it is recommended to allow the graphics to become acclimated to the temperature of where they will be installed for at least 24 hours.
- Application Temperature >50ºF
- Service Temperature 14ºF to 158º

Specifications

Base Material	3 mil flexible polypro
