

DuraPrint Backlit Matte

This Backlit Film features a tough, translucent polyester substrate designed for most lightbox applications. The base material has natural diffusion properties resulting in high impact prints, whether they are backlit or frontlit. This product produces vibrant colors with superb light diffusion quality and will withstand heat from prolonged backlit exposure. Excellent for indoor or outdoor light box signage, backlit tradeshow displays and other light box applications

Printer/Ink Compatibility

This media is compatible with Solvent, Eco-Solvent, UV Curable and latex printers. Always use gloves when handling rolls. Always Print on the outside of the roll, to insure best print performance of media.

Finishing/Mounting Recommendations

Lamination may not be required for some applications. Pressure sensitive laminates like instashield UV Lustre will extend the life of the graphic. Allow prints to dry for 24 hours before laminating. Optically clear pressure sensitive adhesives like Viewbond are recommended for 1st surface and 2nd surface mounting applications.

Applications

Uses include outdoor signage , exhibit displays , transit advertising and any indoor or outdoor lightbox application
